MEASURE - SELECT - SHIP

Convenient and Accurate  
Shipping Solution

## Simplified Shipping

Ship packages using your preferred carrier with confidence

Bedal makes shipping convenient and ensures your hardworking warehouse team get the measure of your shipping packages right, every time. Through Bedal, you take away the risk of any subsequent carrier charges.

## Integrated Technology

Integrates with your preferred Point of Sale (POS) or Warehouse Management Software (WMS)

Bedal is built to integrate and take away the risk of expensive implementation. Our convenient utility tool - Bedal Connect ensures the technology is adaptable to your circumstances.

- ✓ 3PL Warehouses
- ✓ National Posts
- ✓ Private Carriers
- ✓ Carrier Franchisee
- ✓ Click & Collect Shops

- ✓ Small & Medium Businesses

## Modular Capability

Product modularity gives our clients the flexibility to automate gradually.

Bedal is customizable and highly modular. Depending on your current needs, Bedal can be tailored and upgraded on site to suit most environments.

## Bedal 3S Plus

Self-service convenience

Bedal helps your business beat the queues through its self-service functionality. An integrated tablet and label printer allow customers to measure their packages, select their preferred carrier and print a compliant label.

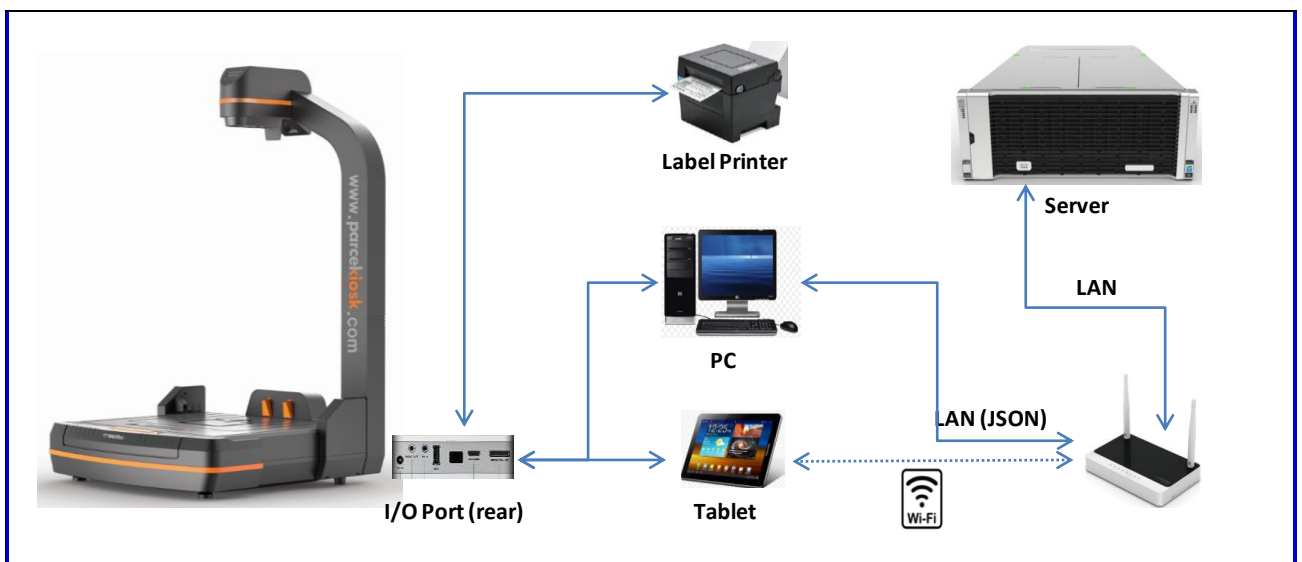

*“We selected Bedal because of its capability to integrate with our existing system. Bedal helped us by increasing the accuracy of our product dimensions, order size calculation and parcel size calculation. We were also able to implement a standard box size logic in order to standardize packing globally. Getting the dimensions right at the warehouse level enables us to negotiate better shipping rates with a range of carriers and most importantly we save a lot of man hours by eliminating manual measurement checks.”*

*“Our finance teams would benefit because they no longer need to reconcile carrier statements. The data captured from Bedal would help our pricing team take crucial decisions when it comes to setting the right pricing models, without the risk of losing on freight costs.”*
